SUMMARY

Junior Data Analyst with hands-on skills in Python (Pandas, NumPy) for data cleaning, data quality, and exploratory data analysis (EDA). Experienced in building data processing and transformation pipelines using SQL, Google Colab, and Deepnote. Familiar with data architecture and ETL/ELT logic. Oriented toward data-driven solutions and data querying components. Fast-growing professional, highly motivated to deepen expertise in Power BI, Microsoft Fabric, and Spark.

WORK EXPERIENCE

Front-end Software Engineer Freelancer

2025 – Present

- Developed and maintained web solutions for international clients, ensuring quality, usability, and on-time delivery. Worked with HTML, CSS, JavaScript, Python, REST APIs, JSON, Git, GitHub, VS Code, and Figma throughout the development lifecycle.

Administrative Assistant Conquista Distribuidora – Brasil

Aug 2020 – Dec 2021

- Collected, organized, and analyzed financial and operational data using advanced Excel (pivot tables, formulas, charts)
 - Created periodic reports and dashboards to support business decision-making
 - Managed large volumes of data with attention to accuracy and information quality
- Supported multi-departmental logistics and operational coordination
-

EDUCATION

Bachelor's Degree — Systems Analysis and Development INFNET, Rio de Janeiro, Brazil

Jun 2025 – Present

High School Diploma Escola Politécnica Brasileira – Natal, Brazil

2019 – 2021

KEY SKILLS

Languages: Python, SQL

Analytics & Data: Pandas, NumPy, EDA, Data Cleaning, Data Quality

Tools: Google Colab, Deepnote, GitHub, REST API, JSON

Visualization: Excel (dashboards, pivot tables), Power BI

Soft Skills: data-driven decision making, problem-solving, cross-functional collaboration
